Visa Status: Student Visa (Subclass 500), Full working rights available from July 2026 (Subclass 485)

PROFESSIONAL SUMMARY

Final-year Master of IT (AI) candidate specializing in bridging the gap between complex data models and intuitive user interfaces. Experienced in engineering robust business logic and front-end architectures using Python, React, and Flutter. Proven ability to decode complex data flows into scalable applications, currently seeking a Graduate Software Engineer role to build intelligent, data-driven solutions.

TECHNICAL SKILLS

User Interface (Frontend): Flutter, React, Tailwind CSS, HTML/CSS

Business Logic (Backend): Python, Dart, C++, Java, JavaScript, SQL, FastAPI, RESTful APIs

Data & Artificial Intelligence: PyTorch, TensorFlow, RAG, Large Language Models (LLMs), Graph Neural Networks (GNNs), Pandas, Numpy, LangChain, Scikit-learn, Tiktoken

Infrastructure & Tools: Git/Github, AWS, S3, Docker, Vercel, Supabase, VS Code, LaTeX

PROJECTS

Prism (RAG Visualiser) | Lead Developer

Jan 2026

Architected an open-source web application to visualize Retrieval-Augmented Generation (RAG) processes. Engineered the user interface using React to decode complex LLM data flows, supported by a robust Python backend for mathematical processing. [Github repository](#)

StepWise | Lead Developer

Nov 2025

Engineered the mobile user interface and business logic layers for a comprehensive student utility platform. Built a scalable front-end with Flutter, communicating with a secure Python/FastAPI backend deployed on AWS. [Live demo](#)

Amazing App | Group Project & Lead Developer

Jan 2023

We built an application for end-to-end file encryption with Google Drive integration. We implemented facial recognition authentication and integrated anti-spoofing technology to ensure robust biometric security. [Github repository](#)

Helping Hand | Lead Developer

July 2020

Engineered a community-driven mobile application to facilitate local volunteer logistics during the COVID-19 pandemic. Architected a localized matching system to connect supply requests with geo-located volunteers, ensuring secure and efficient aid distribution. [Github repository](#)

EDUCATION

MASTER OF IT IN ARTIFICIAL INTELLIGENCE

Macquarie University – Sydney, Australia

Graduating July 2026

BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND ENGINEERING

North South University – Dhaka, Bangladesh

Graduated 2023

WORK EXPERIENCE

CUSTOMER SERVICE TEAM MEMBER

July 2024 – Present

Fairy Meadow Kebabs and Pide,

Fairy Meadow, NSW

Operating in a high-concurrency, fast-paced physical environment. Showing extreme patience, crisis management, and the client-facing communication skills essential for delivering high-quality service under heavy load.

SOFTWARE DEVELOPER (PART-TIME)

May 2021 – June 2024

BinaryCraft

Mirpur, Dhaka

It is a homegrown software development company providing software & IT solutions for financial technology, ecommerce, pharma, manufacturing, retail, etc. industries both locally & globally. [Visit Website.](#)

- **Developed and maintained 8+ multiplatform mobile applications** using Flutter and React.
- Collaborated with teams to design, develop, and deploy new features.
- Successfully **built the ERP system** for Sydney based restaurant named '[Elements Bar & Grill](#)'.
- Conducted thorough testing and debugging to optimise software performance and user experience.

PUBLICATION

Deep learning to aid prescription processing & inventory management for local pharmacies through smartphone application. International Journal of Supply Chain & Management (IJSCM), Vol. 10, No. 4, Aug 2021. Primary Author.
