Address: Wollongong, NSW
Visa Status: Student Visa (Subclass 500), Full working rights available from July 2026 (Subclass 485)

PROFESSIONAL SUMMARY

Final-year Master of IT (AI) candidate at Macquarie University with a strong foundation in machine learning and full-stack development. Experienced in building mobile and web applications using flutter, react and conducting research on large language models (LLMs). Passionate about solving real world problems through scalable software solutions. Seeking a graduate software engineer role starting July 2026.

KEY SKILLS

Software Development • **Problem Solving** • UI/UX Integration • **Project Management** • Agile Methodology • **Open-Source Contribution** • AI Enthusiast • **Research & Innovation** • Version Control & Collaboration • **Cross Platform Development** • Time Management • **Continuous Learning** • Data Structure & Algorithm

TECHNICAL SKILLS

Languages: Python, Dart, SQL, C++, Java, Javascript

AI & ML: PyTorch, TensorFlow, Large Language Models (LLMs), Graph Neural Networks (GNNs), Pandas, Numpy, LangChain, Scikit-learn, Tiktoken.

Web & Mobile: Flutter, React, FastAPI, Tailwind CSS, HTML/CSS, RESTful APIs.

Tools: Git/Github, VS Code, Latex, Jupyter Notebooks, AWS, S3, Raleway, Cloud Console, Vercel.

PROJECTS

Prism (RAG Visualiser) | Lead Developer

Jan 2026

I built a full stack tool called 'prism' that helps engineers debug RAG pipelines. It visualises how different chunking strategies and overlaps affect retrieval accuracy using a python backend for the math and a react frontend for the interactive data visualisation. [Github repository](#)

StepWise | Lead Developer

Nov 2025

Moving to Australia as an international student was a struggle for me, so I built a platform to make the transition easier for others. I developed the whole system from a user-friendly design to a secure backend on AWS to provide real-time support for student needs. Now, I'm constantly updating the live app based on feedback from the community to make sure it's actually solving the problems we face. [Live demo](#)

Amazing App | Group Project & Lead Developer

Jan 2023

I built an app that lets you encrypt files like pdfs and photos, then save them safely to google drive. To make sure nobody else can peek at your stuff, I added a face-scan feature that checks if it's really you before it unlocks anything. I even included "anti-spoofing" tech so people can't trick the camera with a picture of you. [Github repository](#)

Helping Hand | Lead Developer

July 2020

During the pandemic, I created an app called 'Helping Hand' to connect people stuck at home with volunteers in their area. Since many people were locked down without food, money, or medicine, I built a way for them to post exactly what they needed so someone nearby could step in and help. It was all about making sure no one had to struggle through the crisis alone. [Github repository](#)

EDUCATION

MASTER OF IT IN ARTIFICIAL INTELLIGENCE

Macquarie University – Sydney, Australia – July 2024 – July 2026

Current WAM – 65.583

BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND ENGINEERING

North South University – Dhaka, Bangladesh – 2018 - 2023

Graduated with 78.95%

WORK EXPERIENCE

CUSTOMER SERVICE TEAM MEMBER

July 2024 – Present

Fairy Meadow Kebabs and Pide, Wollongong, NSW

My first part-time job in Australia. This place has taught me the communication skills required in a fast-paced environment, handling customer inquiries and resolving issues efficiently.

SOFTWARE DEVELOPER

May 2021 – June 2024

BinaryCraft

It is a homegrown software development company providing software & IT solutions for financial technology, ecommerce, pharma, manufacturing, retail, etc. industries both locally & globally. [Visit Website.](#)

- **Developed and maintained 8+ multiplatform mobile applications** using Flutter and React.
- Collaborated with teams to design, develop, and deploy new features.
- Successfully **built the erp system** for Sydney based restaurant named '[Elements Bar & Grill](#)'.
- Conducted thorough testing and debugging to optimise software performance and user experience.

FULL STACK DEVELOPER (FREELANCE)

Sep 2019 – Oct 2023

UpWork, Fiverr & Contra

I worked as a freelance full stack developer on platforms like upwork, fiverr, and contra, where I delivered end to end solutions for clients across various industries. My work involved front end and back end development, api integration, bug fixes and software testing.

- Worked closely with the development team of [ShareTrip.net](#), a leading ticketing company to build their web app and mobile app.
- **Developed JexMovers**, a food delivery app in the Philippines launched during the covid pandemic.
- **Developed MedWay**, one of the first medicine delivery platform in Bangladesh. [Github repository](#)

PUBLICATION

Deep learning to aid prescription processing & inventory management for local pharmacies through smartphone application

Vol. 10, No. 4, Aug 2021

Primary author

International journal of supply chain & management (IJSCM)
